

Description

GGU-ATTERBERG - The program system GGU-ATTERBERG allows the evaluation and presentation of Atterberg (consistency) limits. You can evaluate the following tests:

- Plastic limit
- Liquid limit

A MiniCAD system is available for additional labelling of graphics. The output of the results in a protocol or as a diagram can be carried out on the screen, or to a printer or plotter.

As data input is in accordance with Windows conventions it can be learnt almost without the use of a handbook. The graphic output supports true-type fonts, colour output and bitmap graphics.

GGU Am Hafen 22 38112 Braunschweig Tel.: 0531/312895	Report: 9999 / 03 Appendix: 3
